Welcome to URIMAT

URIMAT is a leading manufacturer of environmentally friendly products in the sanitary ware industry.

In a place where others are passive, URIMAT is actively setting new trends and standards on a daily basis. The waterless urinals made by the Swiss manufacturer URIMAT are enjoying worldwide acceptance and simultaneously bringing hygiene and ecological protection to thousands of washrooms around the globe. As they discover the innovative technology and the high value retention of our products, new customers are placing their confidence in our solution every day, thereby actively helping to save millions of litres of clean drinking water. In regions where this valuable resource is in short supply, such arguments are becoming ever more crucial in an era of climate change.

As a market leader, URIMAT is fully committed to ecological sustainability. Our products are manufactured using eco-friendly materials and production processes. When choosing our partners we emphasise carbon-neutral production and high ethical standards.

Our uncompromising quality control and leading technology guarantee durable products with odourless, hygienic and ecological operation.

Make a statement today.
Choose URIMAT.

Thank you very much! The URIMAT Team.

A world map in shades of blue with numerous white location pins scattered across all continents, indicating global presence.

Used worldwide

You're in good company
with URIMAT

When you choose to rely on the technology of the market leader – the waterless urinals by URIMAT – you are in excellent company.

Take McDonald's, for example – A global corporation that subscribes to high ecological principles and is committed to sustainability. By installing URIMAT in their premises worldwide, McDonald's is sending a clear message and saving billions of litres of valuable drinking water.

In virtually every industry, we can name prestigious references that place their confidence in us every day. Make a statement now! Choose URIMAT!

URIMAT

The ecological environmental system.

- 1 High-tech polycarbonate bowl, carbon-neutral manufacturing, 100% recyclable
- 2 Unique odour trap technology with integrated cleaning system Saving minimum 100,000 litres of drinking water a year per urinal = 17.5 kg less CO₂
- 3 Microbiological cleaning system
- 4 Financing possibility through advertising

URIMAT sets standards

As a leading company for waterless sanitary technology, URIMAT is continually redefining the quality standard. Our constant striving for new solutions to protect that precious resource, water, have been endorsed over recent years by numerous renowned international environmental awards and certifications.

URIMAT Water is life*.

URIMAT is a leading producer of environmentally friendly products in the sanitary ware industry

* Around 71% of the earth's surface is covered by water. But only 0.3% of all the water on the planet is available in streams, rivers and groundwater for potential use as drinking water.

The original.

PUB WELS rating

Model ranges eco and compact

Innovative and functionally designed urinals made from durable high-tech plastic. No water, no chemicals, no odours. The patented mechanical drain trap and microbiological cleaning agents guarantee trouble-free, odourless operation.

Dimensions (in mm)

MB-ActiveTrap

Sophisticated technology
for the most basic of needs.

The URIMAT MB-ActiveTrap collects the urine and channels it into the waste pipe without flushing, while at the same time sealing in any odours. Fluids are channelled via a vertical membrane straight into the sewage system. Above the membrane there is a microbiological cleaning block which prevents build-up of deposits both inside the odour seal unit and in the waste pipe. As soon as fluids stop flowing through the membrane, it automatically forms an air-tight seal.

After the MB-ActiveCube has dissolved, the red surface beneath the transparent cover signals that the odour trap has to be replaced.

Available for all URIMAT urinal models.

Also available for some conventional waterless urinals that can hold traps with 125mm diameter.

The patent for 100% odour-free function

1 Patented three-way control

The cover of the integrated MB-ActiveCube has three settings which regulate the efficiency of the block, thereby controlling its effective service life.

2 Integrated MB-ActiveCube

The integrated MB-ActiveCube improves hygiene, reduces deposits and prevents the inside of the odour trap and the waste pipe becoming encrusted with organic matter, urine deposits and fats.

3 Livecycle indicator

After the MB-ActiveCube has dissolved, the red surface beneath the transparent cover signals that the odour trap has to be replaced.

4 Vertically sealing membrane system

The vertical membrane technology guarantees that odours are completely sealed away and is able to withstand both negative and positive pressures. It is impossible for gases from the sewage system to escape.

MB-ActiveCleaner

PH-neutral, biological and sustainable.

Dermatologically tested for skin-friendliness and found to be «very good». MB-ActiveCleaner eliminates the bad odours caused when organic matter decomposes. It is particularly well suited for maintenance cleaning and odour elimination in heavily used washrooms & sanitary facilities.

MB-ActiveCleaner contains micro-organisms that penetrate the pores (joints) and destroy any odours caused by organic residues deposited there, leaving a pleasant and lasting freshness. Used daily, it prevents odours from developing.

By delaying re-soiling, MB-ActiveCleaner makes an active contribution to maintaining cleanliness in all environments.

Areas of application

- › Toilets and sanitary facilities
- › Washrooms and showers
- › Façades, passages and stairways
- › Waste containers and refuse collection stations
- › Floors, carpets etc.

URIMAT sets standards

Advertising with Aqua Tech

A high-yield investment.

URIMAT is not only a market leader among waterless urinals, but at the same time offers an advertising medium with significant reach in a clearly defined target group. There is no changing the channel or turning the page. Your advertising message is viewed on average for 40 seconds.

Depending on the model, the urinals from URIMAT offer either static advertising displays or high-resolution LCD-screens with animated messages that hit home within your target group.

A modern and audience-specific medium that allows you or your customers to address your target group in the most effective way. The URIMAT media partners will be pleased to advise you.

The Acceptance Study

- › 93% of all those surveyed said the advertising screen was the first thing they noticed on the URIMAT!
- › 96% find the advertising on the URIMAT positive or aren't bothered by it!
- › 90% remember the message on the URIMAT advertising display!
- › captive audience of
- › 40 seconds
- › no divergence loss

The Acceptance Study was performed in Switzerland by the renowned market research institute, IHA-GfK.

Partition wall and design element in one

Urinal partition walls by URIMAT!

URIMAT uses elegantly shaped urinal partition walls made of Trespa®. These durable dividers have a smooth surface, good hygiene properties and are extremely robust. In addition, they are also very easy to clean.

URIMAT urinal-partition walls make a perfect design element in your washroom.

Model	URIMAT partition wall Trespa	URIMAT partition wall ESG-Glas	URIMAT partition wall Inox
Article code	35.001	35.200	35.250
Colour	● white	● frosted glas	● silver
Weight	6,5 kg	9,0 kg	5.2 kg
Thickness	12mm	8mm	8mm
Special feature	easy to install	ESG-safety glass	Polycarbonate core with stainless steel hull

Mounting frame

The practical mounting element for new installation and renovation

The URIMAT mounting frame ensures an accurate fit and simple assembly involving just four fixing screws. The four mounting brackets ensure highly secure installation and enable precise horizontal and vertical alignment.

- > **Art. 58.515**
Makro-Fix mounting for URIMAT plastic bowls
- > **Art. 58.520**
Kera-Fix mounting for URIMAT ceramic bowls

Ultimately only hard facts count!

Arguments that have persuaded even URIMAT's most demanding customers:

- Annual savings of at least 100,000 litres of drinking water per urinal per year
- No Water consumption
- No urine scale build-up
- No chemicals
- CO2 reduction (at least 175g per m³ water)
- No flushing systems necessary
- CO2-neutral manufacturing
- Worldwide patented system and design
- Microbiological cleaning system
- Advertising Income possible
- Durable materials
- All-round service with our own staff
- Successful since 1998
- Swiss quality
- Leasing options available
